

Klinger 11

A combination of Acrylic yarn and graphite, producing an economic yet versatile synthetic packing, well suited to general service in valves and pumps.

K11 is only one of the Klinger TopLine range of compression packings.

This is an optimised range introduced to provide users with gland sealing products that meet today's demanding services, offering effective and trouble-free sealing during application. To achieve this goal we have selected the best materials and the best production methods. The result is the Klinger TopLine packing range.

Ongoing Test & Development in line with Klinger philosophy will ensure the continued improvement of all TopLine products.

■ *The base yarn of Klinger 11 is spun from carefully selected acrylic filaments. To this we add a controlled amount of graphite dispersion producing a packing that is ideally suited for general valve and pump use.*

■ *The Klingerlock construction ensures a firm yet conformable packing that requires little adjustment after the initial installation.*

■ *The packings low coefficient of friction ensures easy operation and actuation of any valve or pump, without detrimental stem or shaft wear.*

■ *The graphite dispersion enhances the chemical resistance of this TopLine packing allowing it to effectively seal the majority of chemical media commonly found within today's industrial environments.*
