

PRODUCT DATA SHEET

Glass Fibre Yarns

Glass Fibre Yarns

Construction: Glass yarns are manufactured from texturised and twisted 'E' Glass. Due to the extensive treatment of the yarns this product is highly resilient and versatile which makes it an extremely good sealing material. The basic fibres are lightweight, resilient, incombustible and suitable for operation in applications of up to 550_C.

Properties: Glass Yarns are :
Resistant to oils, most chemicals and solvents.
Will not rot and is unaffected by bacterial growth.
Suitable for temperatures up to 550_C.
Have a medium thermal conductivity.
The fibres will not rot and are unaffected by insects, fungi and bacteria etc..

Sizes available:

Diameter	KGs/Coil	Meters/Coil
3mm	3.05	500
4mm	3.08	350
5mm	3.0	175
6mm	3.15	150
8mm	3.50	100
10mm	3.06	60
12mm	3.25	50
15mm	5.40	50
20mm	10.60	50
25mm	10.50	35
30mm	10.40	20
